

October 26, 2009

To whom it may concern:

We started working with Charles Burge of American Laundry Systems in the Fall of 2008. The project was to take a 92,000 Sq. Ft. building and make it a healthcare laundry. We had a design that we felt would work. I hired ALS to fine tune the design and put it on CAD.

By spring 2009 it became obvious that if this project was going to be completed on schedule, we needed help with the everyday management of the project. We signed an agreement with American Laundry Systems to manage the project and complete all the mechanicals.

Our experience with Gerard and his team has been very positive. They are conscientious, hard-working and responsive. The quality of work they have done for us is excellent. The project was completed on time and within budget.

Sincere Regards,

REINO LINEN SERVICE
